

Tier 10 - movement/material generation (what is the practice?)

Take any sound collage from Tier 8 on the app, listen, and intuitively dance to it.

Make a list of reasons why the method of intuitive dancing as a movement generation method is or is not relevant for the urgencies that your collective feels attached to.

This list of reasons is the starting point for different movement generation methods we invite you to fantasize/remember/invent and try out throughout the week.

Collective contribution:

Film a video with your collective dancing new movement material that you developed during this week of the residency.

Use a static camera frame, focusing on the movement / the entire moving body or bodies, maximum 3 minutes, format mp4.

Upload the collective contribution to the iCoDaCo app tagging it as your collective contribution with any other relevant tags and information.

Individual Contribution:

Each artist shall provide a contribution that you find relevant to this tier.

Upload each individual contribution to the iCoDaCo app tagging it as your own contribution with any other relevant tags and information.
