

Contribution Topics & Contexts

Dutch Collective

Astrid

- **How Technology impacts the body and society**

Technology reshapes movement, interaction, and physical presence in a digitally mediated world.

- **Post Humanism**

A lens to question the boundaries between body, identity, and technology, inspiring new movement explorations.

- **Patriarchy Creating Resistance**

An embodied research on how patriarchal structures create visible and invisible barriers within bodies, histories, and spaces. How does oppression manifest in movement?

- **Memory Loss**

Investigating the tension between remembering and forgetting, and how memory loss shapes movement in today's digital society.

Ruben

- **Internal Technology vs External Technology**

Examine the tension between internal, bodily intelligence and external, technological influence. Internal technology refers to the body's innate knowledge—instinct, breath, resilience—while external technology represents everything outside of ourselves, and the digital technology being a metaphor for this

- **Resistance in the body**

How does the body interact with resistance? How resistance shapes movement physically and psychologically.

- **The Battle Within**

The Battle Within explores internal struggles—mental, physical, and emotional—and how resistance can transform into meaningful movement.
